1) Create the arrays

```
import numpy as np
sales = np.array([
[10, 12, 11, 15, 20, 18, 19],
[ 5, 7, 6, 8, 10, 9, 12],
[30, 28, 35, 40, 38, 36, 42],
[14, 13, 15, 16, 18, 17, 20],
[22, 25, 24, 23, 26, 28, 30]
])
products = np.array(["Phone", "Laptop", "Shoes", "Watch", "Headphones"])
days = np.array(["Mon","Tue","Wed","Thu","Fri","Sat","Sun"])
```
